Description

19 in 1 Icade Jamma Multicade PCB

This single PCB contains 19 of the most popular classic arcade games ever! Each game has its original dip switches, which are adjusted through the built-in software menu. Another great feature is 'High Score' save, which will save the top score...even after the power is turned off! This is a brand new board, which I have thoroughly inspected and tested to ensure it is 100% functioning.

Game List: Defender, Stargate, Bubbles, Joust, Robotron, 2084 Blaster, Splat, Rally-X, Battle City, Mario Bros, New Rally-X, Ghost'n Goblins, Solomon's Key, Gadius, Sky Kid, Ice Climber, Super Mario Bros, Do! RunRun.

Features: Universal JAMMA Connector. User Friendly Game Selection Screen. Free Play or Quarter/Token Option. New High Score Saver. Supports CGA (standard resolution) and VGA (high resolution) Monitors. Supports Upright cabinets with a HORIZONTAL monitor only. Supports Dual Trackball and/or Joystick Controls. Each Game Is Fully Customizable (Difficulty, Game Speed, Number of Lives, etc). Enable/Disable Specific Games. Standard JAMMA video output or VGA output (hook PC monitor up directly). Uses standard arcade power supply or AT PC power supply (with standard 4-pin molex connector, the same used for hard drives/cd rom drives).
