Description

It's really fun to play WWE's upper playfield wrestling ring. The flipper buttons operate sling shot style kickers located in the ropes surrounding the ring. The Pro game also has a 3 drop target bank, an eject, numerous ramps, all LED lighting including some tri-color, and much more. We are licensing 10 songs for this game, including intro music for specific wrestlers that players can choose. WWE announcers Jerry the "King" Lawlor and Michael Cole add to play excitement.

We have been able to get wrestling great Hulk Hogan to autograph plaques for the Legends of Wrestlemania Limited Edition, adding to the game's collectability. It was difficult, but we were able to get 400 plaques signed, so that is the total number of LE games we can make. The LE shows actual WWE wrestling video on the playfield level 5.7 inch LCD "Titantron" mounted directly above the ring. In the middle of the wrestling ring is a "Chaos" spinning disc. The "Wham! Arm" ramp level flipper knocks balls off one of the LE's 7 ramps. And there is more. Artwork on the Legends LE includes Classic WWE Wrestlers.

Our new SPIKE™ electronics system in WWE reduces our games' complexity, resulting in greater reliability and ease of service. It is both modular and scalable, to accommodate and support features we will design in the future. I know you will be impressed with the SPIKE™ advancements.
